

IN THE CLAIMS

1. **(currently amended)** A communication service information providing method comprising the steps of:

receiving a call, ~~which is transmitted~~ from a calling ~~subscriber terminal~~ for connecting to a called terminal used by a subscriber of a communication counter party that wants to establish a communication and subscribes to a plurality of communication services, said call being used to select one of the plurality of communication services; and

providing information related to another communication service subscribed to by the ~~called subscriber~~ of the communication counter party that wants to establish the communication for connecting to the calling ~~subscriber terminal~~, the provided information being usable for selecting, ~~by at the calling subscriber terminal~~, said another communication service when the call to the called ~~subscriber terminal~~ is in a non-connectable state.

2. **(currently amended)** A communication service information providing method comprising the steps of:

receiving a call, ~~which is transmitted~~ from a calling ~~subscriber terminal~~ for connecting to a called terminal used by a subscriber of a communication counter party that wants to establish a communication and subscribes to a plurality of communication services, said call being used to select one of the plurality of communication services;

providing information related to another communication service subscribed to by the ~~called subscriber~~ of the communication counter party that wants to establish the communication for connecting to the calling ~~subscriber terminal~~, the provided information being usable for selecting, ~~by at the calling subscriber terminal~~, said another communication service when the call to the called ~~subscriber terminal~~ is in a non-connectable state; and

when the calling ~~subscriber~~ terminal selects one of the other communication services from the provided information, trying to connect to the called terminal used by the subscriber of the communication counter party that wants to establish the communication by way ~~of~~ fusing the selected other communication service.

3. – 14. (canceled)

15. (previously presented) A communication network comprising:

reception means for receiving a call from a calling terminal for connecting to a called terminal used by a subscriber of a communication counter party that wants to establish a communication and subscribes to a plurality of communication services, said call being used to select one of the plurality of communication services; and

providing means for providing information related to another communication service subscribed to by the subscriber of the communication counter party that wants to establish the communication for connecting to the calling terminal, the provided information being usable for selecting, at the calling terminal, said another communication service when the call to the called terminal is in a non-connectable state.

16. **(currently amended)** A communication network comprising:

reception means for receiving a call from a calling terminal for connecting to a called terminal used by a subscriber of a communication counter party that wants to establish a communication and subscribes to a plurality of communication services, said call being used to select one of the plurality of communication services;

providing means for providing information related to another communication service subscribed to by the subscriber of the communication counter party that wants to establish the

communication for connecting to the calling terminal, the provided information being usable for selecting, at the calling terminal, said another communication service when the call to the called terminal is in a non-connectable state; and

connection means in which when the calling terminal selects one of other communication services from the provided information, the connection means tries to connect with the called terminal used by the subscriber of the communication counter party that wants to establish the communication by using the selected other communication service.

17. – 20. (canceled)

21. **(currently amended)** A communication service information providing method comprising the steps of:

receiving a call, which is transmitted from a calling ~~subscriber~~ terminal for connecting to a called ~~subscriber~~ terminal that subscribes to a plurality of communication services, said call being used to select one of the plurality of communication services; and

providing information related to another communication service subscribed to by the called ~~subscriber~~ terminal and subscriber identification information corresponding to said another communication service, the provided information being usable for selecting, ~~by~~ at the calling ~~subscriber~~ terminal, said another communication service when the call to the called ~~subscriber~~ terminal is in a non-connectable state.

22. – 24. (canceled)
